

DEEPAK R

Artificial Intelligence & Machine Learning Undergraduate — Bengaluru, India
deepak251817@gmail.com — +91 8867034217 — GitHub — LinkedIn

Education

K.S. Institute of Technology, Bengaluru	2023 – 2027
B.E. in Artificial Intelligence and Machine Learning	CGPA: 9.16/10
Vijaya Composite PU College, Bengaluru	2021 – 2023
PUC – Science (PCMC)	85.5%
V.E.T. School, Bengaluru	2021
SSLC / 10th Standard	74.56%

Technical Skills

Languages: Python, Java, JavaScript, SQL
Frontend: HTML5, CSS3, React.js, Vite, Tailwind CSS
Backend: Node.js, FastAPI, REST APIs
AI/ML: Pandas, NumPy, Scikit-learn, Linear Regression, Logistic Regression, Isolation Forest, TF-IDF
Databases: MongoDB, MySQL
Tools & APIs: Git, GitHub, VS Code, Mapbox API, OpenWeather API, Leaflet, Recharts

Projects

FinTrack – AI Expense Manager	GitHub
<i>Python, FastAPI, Pandas, NumPy, Scikit-learn, JavaScript</i>	
- Developed an AI-powered expense management application for tracking transactions, budgets, and spending patterns. - Implemented expense forecasting using Linear Regression and automatic transaction categorization using TF-IDF and Logistic Regression. - Added Isolation Forest-based anomaly detection and FastAPI REST endpoints for machine learning services.	
STARS RouteFinder – Road Safety Navigation	GitHub
<i>React, Vite, Mapbox GL JS, Recharts, OpenWeather API, Tesseract.js</i>	
- Developed a route planning application with multiple route comparison and interactive Mapbox visualization. - Integrated traffic and weather information to provide route-specific traffic and environmental insights. - Implemented pothole reporting using camera uploads, EXIF GPS extraction, browser geolocation, and Tesseract.js OCR fallback.	
Ocean Guardian AI	GitHub
<i>React, Vite, Tailwind CSS, Recharts, Leaflet, Framer Motion</i>	
- Developed an interactive platform for monitoring ocean health, marine biodiversity, and pollution. - Built dashboards with interactive maps and data visualizations for ocean health, temperature, species, coral reefs, and pollution trends. - Implemented alert monitoring, reports, ocean details, and an AI assistant interface using a responsive React application.	

Hackathons & Achievements

HackOcean 2026 – Finalist	July 2026
National-Level Frontend Hackathon, Digital Learning Group (DLG), MITS Gwalior	
Qualified as a finalist in a national-level frontend hackathon, demonstrating frontend development, problem solving, innovation, and teamwork.	
Null Point – Technical Event Participant	K.S. Institute of Technology, Bengaluru

Certifications

Deloitte Australia Data Analytics Job Simulation – Forage, 2026
Scientific Computing with Python – freeCodeCamp
Python Fundamentals – Infosys Springboard
Java for Beginners – Infosys Springboard
Java Programming – Great Learning
UI/UX for Beginners – Great Learning
